# About SANAKO

SANAKO is an international software company producing educational technology. Sanako's award-winning solutions are used in more than 19,000 schools, higher educational institutions and corporations in over 100 countries worldwide. Headquarters are located in Finland with sales offices in major locations across the globe.

First-rate products and services are supported by a network of knowledgeable distributors operating in nearly 70 countries.

SANAKO is a Microsoft® Certified Partner, a WorldDidac Quality Charter member and corporate member of the International Society for Technology in Education (ISTE®).

SANAKO Study software is validated to work with the Intel® Learning Series family of products.

# Solutions for the Entire Institution

SANAKO solutions can be deployed across the entire institution to help schools maximize their IT investments while ensuring quality learning results.

Our managed learning solutions make use of broadband and Wi-Fi to deliver motivating learning experiences throughout the campus.

SANAKO learning solutions work together to provide a campus-wide learning environment that ensures maximum learning exposure. Moreover, SANAKO technology is supported by a comprehensive program of services and support that ensure the longevity of the school's technology investment.

## **SANAKO solutions support and integrate teaching and learning for:**

- Independent on-campus study
- Live learning in classroom environments
- Independent study at home
- Lesson preparation and delivery for teachers
- Whole school learning
- Dynamic deployment of learning software throughout the school

# SANAKO Lab 100

## The affordable high performance digital language teaching solution

SANAKO Lab 100 is a simple, effective and versatile language teaching option that provides practical tools for developing students' foreign language skills. With its easy-to-use student digital recorder units (User Audio Panels) and teacher PC, the Lab 100 is perfect for schools that want an affordable solution that makes use of a range of analog and digital audio sources to create a rich menu of effective learning activities.

Sanako Lab 100 offers a variety of options for teacher-student interaction, student-student collaboration, independent learning, and student testing, evaluation and progress tracking.

Lab 100 is compatible with Microsoft technology, making it a future-proof investment and ensuring compatibility with Windows-based applications.

### Many options for skills development:

- Fully digital technology
- Traditional language drills
- Student testing and progress tracking
- Self-directed student activity
- AP® testing capability
- Podcasting to expand learning possibilities
- Available in a mobile cart solution

# SANAKO Lab 100 Simultaneous Interpretation Training System (STS)

Realistic professional training for interpretation studies

As a training system, SANAKO Lab 100 STS offers additional features beyond standard conference interpretation equipment, such as the integration of student response recording and the availability of alternate program sources, in addition to the delegate's microphones.

These modifications transform a traditional conference system, allowing students to record their attempts at interpreting, and to listen to other sources for interpretation, such as CDs, cassette recorders and stored media files.

*SANAKO Lab 100 STS at  
Leeds University, UK*

## SANAKO Lab 300

### A first-class language teaching center with multimedia and IT resources

This dynamic and fully interactive teaching solution is equipped with classroom resource management features. Its excellent sound quality ensures that students can develop their listening and oral reproduction skills, while a wide range of program sources (Internet, CD, DVD, VCRs, cassette recorders, satellite and video distribution systems) add depth and variety to lessons.

SANAKO Lab 300 is an enjoyable and effective tool for teachers and students. Fast digitization of teaching material makes it easier for teachers to quickly convert analog material to digital format for extended use and storage.

Classroom management features allow teachers to launch and close programs and files for students, as well as control their PCs. Teachers can communicate with individual students, groups, or the entire class and listen to their oral exercises. Lab 300 also provides teachers with tools for cataloging and managing media resources in the learning environment. AP® testing is available in Lab 300, helping teachers and students to get the best results when preparing for college entrance exams.

#### Easy and effective teaching with SANAKO Lab 300:

- Easy-to-use Media Assistant for learning content in text, video and sound formats
- Management and administration of all lab activities with one central unit
- Tools for student feedback, support and testing
- Rich multimedia content at students' fingertips
- Teacher-student and student-student linguistic interaction
- Full spectrum of analog and digital language learning material
- Podcasting to expand learning possibilities

# SANAKO Media Assistant Duo/Solo

The fully interactive Digital Recorders that make learning a stimulating experience

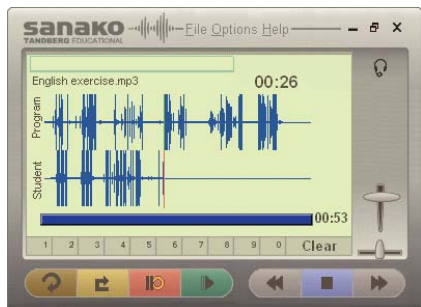

SANAKO has developed its own digital recorder with enhanced features specifically for use in language teaching and learning. Media Assistant makes learning with digital audio, video and text files a stimulating experience. Students can play back the content and simultaneously record their comments, responses or translations.

This innovative digital recorder also offers users a multimedia authoring tool to create their own learning material by subtitling audio and video files and adding and saving digital bookmarks with questions or comments.

The variable speed playback feature in Media Assistant gives students more independence and control in learning. The ability to package a series of files using SANAKO Media Assistant means that teachers can create exercises outside of the language lab environment.

## **SANAKO Media Assistant allows students and teachers to:**

- Introduce audio, video, text and Internet
- Simultaneously record comments, responses or translations while playing back content
- Watch video files, listen to audio clips from hard disk or Internet while recording speech for comparison with the original
- Create learning material by subtitling audio and video files
- Add and save digital bookmarks with questions or comments

*The pronunciation graph helps students improve their oral skills.*

SANAKO Media Assistant Duo is included in SANAKO Lab 300. Media Assistant Solo can be purchased separately to use as a stand-alone digital recorder.

# SANAKO Study 500

## Modular software for teaching with IT and Internet resources

SANAKO Study 500 is a software-based teaching solution that combines the use of ICT resources with multimedia and Internet to help teachers deliver live interaction for effective instruction in any subject area.

Study 500 is modular and expandable and contains classroom management capabilities.

Study 500 provides a whole-school solution for IT based teaching. It is easily integrated into any existing IT classroom, including wireless environments\*, creating a multi-purpose interactive classroom without expensive investments in hardware.

It's affordable, easy to install, and additional module packages with groups of related features can be installed by the customer as needed, to cater to varied teaching requirements.

Study 500 is compatible with Microsoft technology, making it a future-proof investment. Plug-in modules offer enhanced testing and video usage. Study 500 can be upgraded to Study 700 or Study 1200 to provide language learning capabilities, and has been certified for use with Microsoft® Windows® Vista™, and is compatible with Windows 7.

\* Certain limitations may apply.

### **SANAKO Study 500 helps teachers improve learning outcomes by allowing them to:**

- Interact with students individually or in groups
- Support learning by tracking student progress
- Focus learning activities including web browsing, and stay in control of the class
- Encourage student engagement with student voting
- Enhance collaboration with Microsoft® OneNote®
- Focus students' attention using Application control
- Save time sharing and collecting homework assignments

# SANAKO Study 700

## Affordable language learning software

SANAKO Study 700 is affordable language learning software that is ideal for introductory language programs, younger learners or beginners. SANAKO Study 700 is designed to help teachers provide the appropriate level of support and encouragement for basic level language activities, and as such represents an important addition to the SANAKO Study range of teaching software.

Study 700 can help schools expand their range of language learning programs by providing an introductory level solution for younger learners or beginners.

It's also suitable for schools looking to install their first language learning solution or provide an easy-to-use facility for adult learners. Students benefit from essential language learning functionalities such as listening and pair and group discussion, while teachers are provided with the tools to support and monitor student activity.

### **A straightforward approach to language teaching with:**

- Pair and group discussion to develop oral skills
- Teacher-student communication for individual learning support
- Key features for introducing or expanding language learning programs
- The possibility to upgrade to full-featured SANAKO Study 1200
- Voting feature to encourage student engagement
- Digital learning resources for students; tools for teachers to monitor, guide and mentor

# SANAKO Study 1200

## Modular, flexible language teaching software

SANAKO Study 1200 is language teaching software that meets any institution's demand for wholeschool teaching that is dynamic and scalable. Study 1200 is compatible with Microsoft technology, making it a future-proof investment.

Study 1200 is also flexible and expandable, with plug-in modules that introduce additional teaching or learning activities, or classroom management functions. Sanako Study 1200 is designed for intensive listening and voice-based activities.

Its digital recorder allows the playback of material for activities such as listening comprehension, and also allows students to record their voices for activities such as model imitation and reading practice. Study 1200 provides learners with Study Lite Recorder, a student recorder for independent language learning.

Study 1200 has been certified for use with Microsoft® Windows® Vista™ and is compatible with Windows 7.

### Software-based language teaching offers many benefits:

- Round table discussion for advanced oral skills development
- Internet and IT resources modernize language learning
- Voice and text communication enhance interaction
- Pair and group discussion activities motivate learners
- Intensive voice-based activities offer oral language practice
- Homework function saves time sharing and collecting assignments

# SANAKO Study Science Lab

An interactive approach to learning science

SANAKO Study Science Lab can convert any PC classroom or set of laptops into a state-of-the-art science lab at an affordable price.

SANAKO Study Science Lab provides teachers and students with true-to-life lab experiences in a safe environment. The solution includes stimulating and interactive multimedia content for simulating science experiments, along with essential classroom management tools to help teachers differentiate and personalize student learning as they engage in experiments.

The convenient digital learning content is pedagogically-proven and makes it easy for teachers to convert a regular computer classroom or laptop solution into an interactive science lab by simply downloading and launching the appropriate experiment for students.

## **Make science teaching easier and more affordable by:**

- Using an inexpensive and reusable software solution
- Avoiding investment in multiple sets of equipment
- Easily deploying real-life simulations for different group sizes
- Quickly setting up practical experiments
- Providing more individual practice time for all students
- Demonstrating real-life experiments for students to duplicate digitally
- Safely conducting challenging experiments
- Differentiating experiments using grouping feature
- Supporting students with monitoring tools
- Encouraging student engagement with the student voting feature

# SANAKO Study Modules

Easy teaching with video, easy test creation

## **SANAKO Study Video Live Module: Plug in and Play Video!**

SANAKO Study plug-in modules enhance teaching and learning effectiveness in Study teaching software.

The Video Streamer allows teachers to send video to students from analog sources such as DVD or VHS players or even satellite receivers, offering a number of options for enhancing teaching with video material.

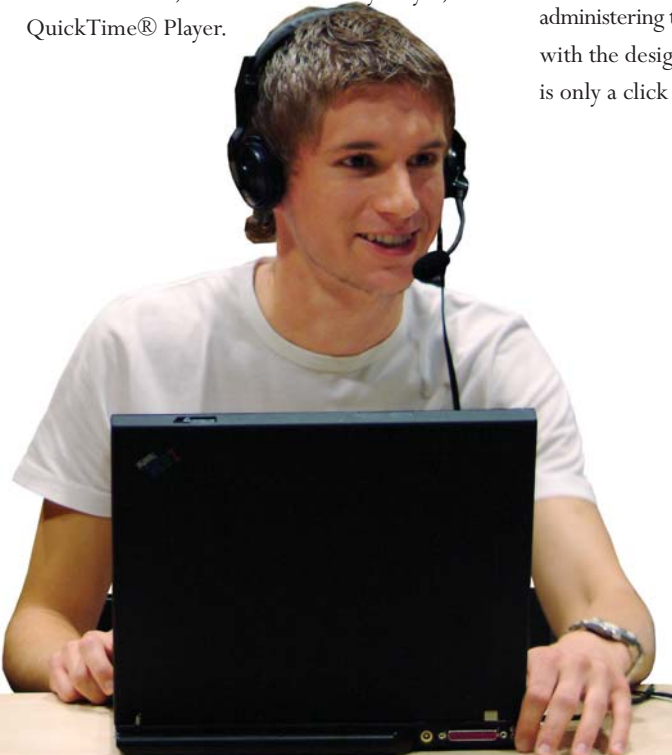

Content streamed using the module can be saved digitally for future use, and viewed using SANAKO Media Assistant, the SANAKO Study Player, and QuickTime® Player.

## **SANAKO Study Examination Module: Exam Creation Made Easy!**

SANAKO Study Examination Module introduces a specialized testing function to assist teachers in modernizing and streamlining the delivery of exams.

Teachers can design any kind of question to test a particular skill or student ability, using the helpful prompts and instructions in the wizard - multiple choice, free response and more!

Teachers may even set the time, outline instructions for completing exams and preview them before administering the tests. Once the teacher is satisfied with the design, launching the exam for students is only a click away!

# SANAKO Headsets

Premium quality multi-purpose headsets

*SANAKO SLH-07 Headset*

## **SANAKO Headset SLH-07**

The durable SLH-07 has been specially designed to offer the clearest sound quality for listening to audio playback. The attached condenser microphone provides the best quality sound for fully comprehensible voice recordings.

It is suitable for a number of working environments, including language studies, broadcasting and audio and video editing activities.

### **When better listening matters, select a SANAKO Headset:**

- Best possible sound quality for audio playback
- Guaranteed comfort – replaceable ear cushions and adjustable padded headband
- Precision condenser microphone
- Fully adjustable microphone boom for outstanding speech reproduction
- Fitted with a removable cable for easy storage and replacement

# SANAKO Study 20

Security for the networked environment

SANAKO Study 20 is a protection tool that safeguards the administrators' carefully designed PC environment, and defends it from unauthorized changes, whether deliberate or unintentional.

Study 20 gives administrators' the freedom to construct an open-access PC environment for the full benefit of users, knowing that their baseline settings cannot be altered. This product can be used with laptops, notebooks and conventional PCs.

### **SANAKO Study 20 offers:**

- Cost-efficient PC protection
- High-level security without hardware components
- Easy installation
- Remote activation of protection features
- Automatic or manual restoration of default settings

# SANAKO Services

## Guaranteed peace of mind

Provided by our global network of sales partners, SANAKO services have been designed to ensure the smooth and uninterrupted performance of our technology in all teaching environments. Our services include installation and training and are delivered by our professional global partner network.

### **SANAKO Software Maintenance**

SANAKO Software Maintenance Customers who purchase SANAKO Software Maintenance will receive product upgrades and new releases that become available during a maximum coverage period of 3 years - easily and conveniently!

### **SANAKO Installation Services**

We work with your personnel to provide efficient installation and basic introductory training.

### **SANAKO Training Services**
